Dear All,

As promised earlier on, I have produced a set of short versions of presentations given at the Indoor Air Conference '93, Helsinki, Finland. They are written in everyday language and try to "make the point" in a more journalistic way. This set covers the first volume - Health Effects.

If you find them useful and if you are able to have them published in one form or the other (letters to the editor, articles), please let me know for my statistics.

Thanks in advance,

Helmut
